

## I'M CHARGED! AI in the Classroom

### Learning and Experimenting

Engage in professional learning and explore various AI tools.

### Efficiency and Planning

Utilize AI tools to streamline administrative and preparation tasks.

### Enhancing Materials

Use AI to adapt, personalize, or generate instructional resources for students, directly impacting instruction.

### Modeling AI Literacy

Demonstrate ethical use for both students and colleagues.

### Strategically Integrating

Integrate AI tools into the learning process to provide personalized practice, immediate feedback, or scaffolded support for students.

### Redesigning Assignments

Uses AI to redefine and create assignments that provide opportunities for deeper learning.
